heme	Priority Management Directions	Local Areas								
	What actions we need to focus on:	MRF	C-K	MSB	MSC	A-W	AB	wc	NWC	AL
Biodiversity	Community and government partnerships to support integrated cross tenure delivery	х	х	х	х	х	х	х	х	х
	Landscape scale interventions to reduce threats – multiple species benefits	Х	Х	Х	Х	Х	Х	Х	х	Х
	Targeted/specialised interventions (where appropriate) to reduce threats – single species benefits	х	х	х	х			х		
	Climate ready interventions to provide for improved resilience and adaptive capacity	Х	Х	Х	Х	Х	Х	Х	х	Х
	Collaborations to maximise the potential of carbon plantings to deliver biodiversity co-benefits	Х	Х	х	х	х	х	Х	х	х
	Incorporation of cultural values, objectives, knowledge and practice; as self-determined by Traditional Owners	х	х	х	х	х	х	х	х	х
	Maintaining previous investment where appropriate to ensure the ongoing effectiveness of significant works programs	х	х	х	х	х	х	х	х	х
	Applying seasonally adaptive, and where required (e.g. extreme events), responsive approaches	х	х	х	х	х	х	х	х	х
	Ensuring that amenity and/or recreation focused activity complements existing natural and cultural values		х	х	х	х		х		
Waterways	Community and government partnerships to support integrated cross tenure delivery	Х	Х		х		х	Х	х	х
	Landscape scale interventions that reduce key threats and provide whole of system benefits	Х	Х		х		х	Х	х	х
	Targeted/specialised interventions (where appropriate) to reduce key threats and provide location and/or issue specific benefits	х	Х				х		х	
	Incorporation of cultural values, objectives, knowledge and practice; as self-determined by Traditional Owners	х	х	х	х	х	х	х	х	х
	Maintaining previous investment where appropriate to ensure the ongoing effectiveness of significant works programs	х	х		х		х	х	х	х
	Applying seasonally adaptive, and where required (e.g. extreme events), responsive approaches	х	х		х		х	х		х
	Climate ready interventions to provide for improved resilience and adaptive capacity	Х	Х		Х		Х	Х	х	Х
	Providing shared benefits (i.e. recreational and cultural outcomes) that complement environmental and economic requirements.	х	х				х		х	
	Applying integrated water management (IWM) approaches to best utilise all urban water sources for environmental, social and economic outcomes.	x	Х							

Tł

**Table A9** | Priority Management Directions for each Local Area to deliver against the whole-of-region medium-term (6-year) outcome targets identified for our biodiversity, waterway, agricultural land, culture and heritage, and community capacity for NRM assets.

Theme	Priority Management Directions	Local Areas								
menne	What actions we need to focus on:	MRF	C-K	MSB	MSC	A-W	AB	WC	NWC	AL
	Research, extension and industry partnerships to support effective knowledge transfer									Х
	Supporting innovative approaches to delivery, including the application of new technology									Х
	Diverse, adaptable, and resilient agricultural systems that maximise production potential,									
	minimise risk, and enhance viability - including drought preparedness and climate ready									х
	strategies									
and	Maintaining groundcover above regional thresholds									х
Agricultural Land	Increasing the soil organic carbon stocks of agricultural soils, including collaborations to									x
	maximise the potential of emerging carbon markets									^
	Managing rootzone drainage within required thresholds									х
	Management options for reclaiming, stabilising and utilising agricultural soils that are severely									x
	degraded, and have limited production potential									~
	Anticipatory and adaptive approaches to pests, disease and weed management -									x
	incorporating sound biosecurity practices and cross-tenure collaborations									~
	Incorporation of cultural values, objectives, knowledge and practice; as self-determined by									x
	Traditional Owners									^
Culture & Heritage	Advancing opportunities for self-determined participation and leadership by Traditional Owners	Х	Х	х	х	х	х	Х	х	х
	Advancing opportunities for self-determined participation and leadership by Traditional Owners	Х	Х	х	х	х	х	Х	х	х
itta	Rejuvenation and application of Traditional Owner led practices to meet cultural objectives;	х	х	х	х	х	х	х	x	x
Че С	including social, ecological and economic co-benefits	~	A	~	~	~	Χ	X	~	~
	Application of Cultural Landscapes within regional planning and management frameworks.	Х	Х	Х	Х	Х	х	Х	Х	Х
Community Capacity for NRM	Building the capacity of landholders, community groups, Traditional Owners, land owners,	х	х	х	х	х	х	х	х	х
	and individuals to support regional NRM efforts	~	~		~	~	~		~	~
	Supporting and responding to the evolving needs of landholders, community groups,	х	х	х	х	х	х	х	х	x
	Traditional Owners, and individuals already participating in NRM	~	Λ	~	~	~	х	Χ	~	~
	Facilitating opportunities for broader and more diverse participation in regional NRM efforts	Х	Х	х	х	х	х	Х	х	х
	Advancing opportunities for self-determined participation and leadership by Traditional Owners.	х	х	х	х	х	х	х	х	х
